

SL-ASR1616HC

The Aesir 1616HC is a sleek dual-bend linear neon with the added glare-protection of a built-in honeycomb louvre across the face of the lit surface.

The slim width of 16mm is the perfect size to be a slim-line linear system but not generate glare from having too higher output from an aperture that is too narrow.

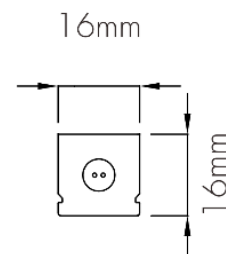

Aesir 1616HC is IP67 & IK06 and features a 50,000hrs or 5 year warranty.

The colour choice is at peak performance, with CRI-90 as standard across a range of fixed-white CCT options to choose from.

Installation is via single bracket, clear top-bracket, fixed channel, or flexible continuous bracket.
