

The Arinna features a recessed low-glare optical lens array.

Tool-less entry and a fully replaceable head provides the option to maintain drivers, SPD's, or LEDs at the workshop, or upgrade easily to the latest LED, driver, or control technology to future proof the luminaire.

The Arinna features a blend of anti-UV PC lens with a wide recessed reflector under toughened glass. Easy to clean and maintenance free.

ADC12 die-casting provides a strong and corrosion-resistant base for a multilayer powder-coat finish.

code	SS-ARN
